

Sologne® 4R* for wild boars

The solution against the passing of wild boars

Product description

Heavy welded fence designed to contain wild boars: pens, hunting and protection against damages.

- ▶ Exceptional longevity thanks to the CrapalOptimum® coating made of an alloy of Zinc, Aluminium and Magnesium which protects durably from corrosion
- ▶ *) 4R means:
 - **R**obustness – High strength wire (70 to 90 kg/mm²)
 - **R**igidity – Wire of large diameter
 - **R**esistance to corrosion thanks to CrapalOptimum®
 - **R**esistance to shocks and animal thrust
- ▶ 50 cm are buried and guarantee the non crossing of burrowing animals
- ▶ Tightened meshes at the bottom of the fence prevent the animal to force the fence with his snout

Applications

- ▶ Protection of farming, golf courses, etc..
- ▶ Wild boars parks, hunting areas

Life span **5x longer** than EN 10244-2 heavily galvanized

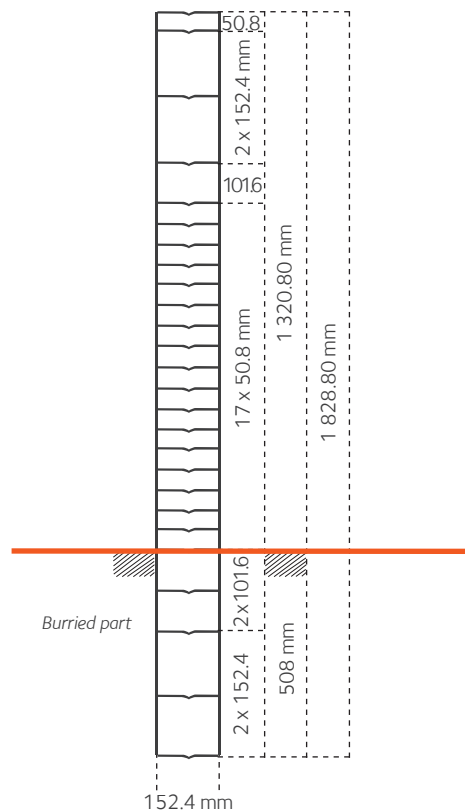

Characteristics

- ▶ **Fence with burried part:**
 - Bottom wires Ø 3.40 mm; Rm 70 to 90 kg/mm²
 - Horizontal wires Ø 3.00 mm; Rm 70 to 90 kg/mm²
 - Vertical wires Ø 3.00 mm; Rm 40 to 55 kg/mm²

Nomination	Height (cm)	Length (m)	Weight (kg)	Rolls/pallet
180-26-15	183	50	107	6

- ▶ Complies with EN 10223-4 standard
