

EstateWIRE® FX

The FX Knot Fence with **2LIFE®** technology.

Stronger, Longer Lasting
Fencing for all your Livestock.

Made in UK

EstateWIRE

with  anti-corrosion technology.

ArcelorMittal have combined 2Life[®] anti-corrosive technology with the rigid strength forming advantage of the FX knot to deliver a stronger, longer lasting fence for all your livestock. **GUARANTEED**

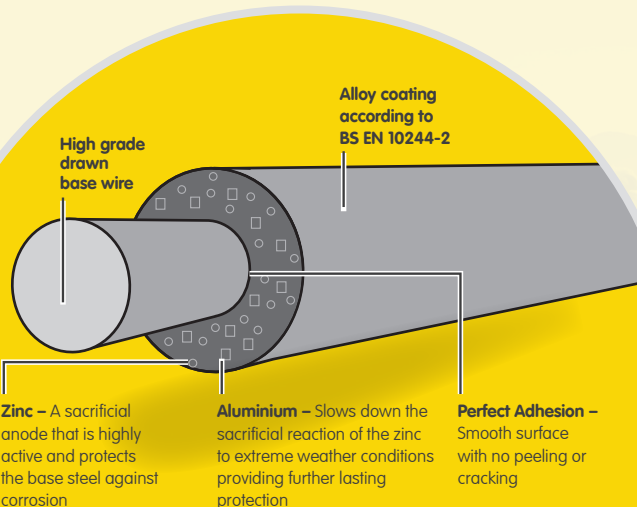

anti corrosive technology is different

How does it work?

The central core that runs through EstateWIRE 2Life[®] is a high grade steel base wire.

We take this superior grade steel wire and make it even better by encapsulating it in our 2Life[®] protective zinc aluminium alloy (BS EN 10244-2 Class A). The alloy adheres to the steel base wire and protects it against the elements.

In coastal or highland locations, high or sub zero temperatures and in extreme weather conditions, 2Life[®] will last at least twice as long as heavily galvanised wire BS EN 10244-2 Class A.

The Estate[®]WIRE FX knot - a major breakthrough in stock fencing design.

- Animal hide, skin and coat friendly reducing the risk of injury to livestock and people
- Stronger than traditional hinge joint fence
- Better vertical rigidity due to solid vertical wires
- More horizontal rigidity, enabling an easier, more professional installation
- Manufactured to BS EN 10223-5
- Galvanised to BS EN 10244-2
- Guaranteed to last at least twice as long as zinc only galvanised products to BS EN 10244-2 Class A.

Rapid tying off

Estate[®]WIRE FX is manufactured using continuous horizontal and vertical wires. The horizontal and vertical wires are held together at their cross over point by individual FX knots.

Removing the FX knots along a vertical wire allows the vertical wire to be removed quickly creating the horizontal tail wires for tying off.

Unlimited applications due to a comprehensive number of mesh apertures.

Bespoke mesh patterns.

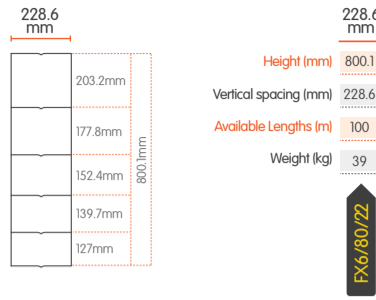

Talk to us about bespoke mesh patterns. We design and manufacture to your specifications.

with  anti-corrosion technology.

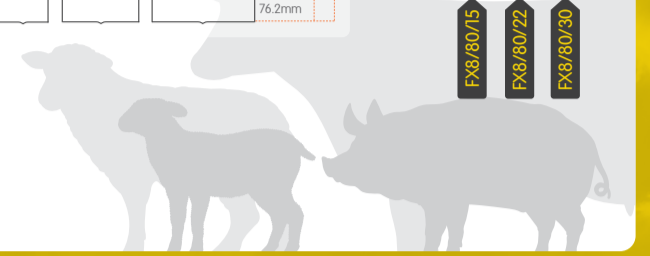

Choose from our comprehensive range of standard mesh patterns and roll lengths.
