

ArcelorMittal Fibres

Reinforced concrete solutions

Transforming reinforced concrete
for the tunnel construction industry.

TUNNELS

ArcelorMittal

ArcelorMittal

ArcelorMittal Fibres is working with **Engineers, Construction companies** and suppliers of **Precast and Ready-mix** products on some of the most challenging **tunnelling** projects in the world.

Our partnerships with clients responsible for major engineering and construction contracts is transforming the reinforced concrete industry and creating a better-built world; a world that is being constructed more quickly, more safely, more efficiently and with greater creative ingenuity.

ArcelorMittal Fibres, part of the ArcelorMittal Group – the metals and mining industry leader, is an industry expert and global provider of reinforced concrete solutions.

From our three state-of-the-art production facilities in the UK, Luxembourg and Poland, we develop, manufacture and supply premium quality steel fibres to construction markets around the world.

Vertical integration.
Unparalleled value.

Our mining, steel production, processing, manufacturing and distribution operations are all undertaken by ArcelorMittal.

Our fully integrated business model gives us complete control over the quality of our raw materials and the highest levels of confidence in our production methods and processes, saving us time and resources.

This, combined with our world class technical expertise, gives our customers unparalleled value.

Supporting you from start to finish.

The right advice. The right fibres. The right solutions.

ArcelorMittal Fibres do much more than manufacture and supply a comprehensive range of premium quality steel fibres. We support you to ensure the success of your project from start to finish.

WE OFFER EXPERTISE ON:

- setting up your project specification
- the most appropriate fibre type to comply with the specification
- optimum dosage rates to guarantee performance
- concrete mix design optimisation

- the supervision of performance tests
- on-site support and advice on dosing and mixing
- the installation of dosing equipment

We provide all the support your project requires, from the early planning stages through to project completion. We are here to support and assist you at every stage.

“ArcelorMittal Fibres provided expertise and support from start to finish. Supporting us throughout was something they did very well.”

Nick Lowe
Production Manager – Segment Factory, Dragados-Sisk Joint Venture.
Crossrail Thames Tunnel – East.

ACCESS TO A GLOBAL RESEARCH & DEVELOPMENT NETWORK

Operating for all ArcelorMittal group units, ArcelorMittal Fibres benefits from the group's worldwide research and development resources. This is the cornerstone of sustainable development and innovation and it ensures the continuous renewal of ArcelorMittal's product offer.

Worldwide the ArcelorMittal group has:

1,400 full time researchers

12 research sites

€219 million spending in total in 2016 of which around €175 million spent in Europe

EXPERTISE AND AMBITION

ArcelorMittal Fibres is the first-choice provider of reinforced concrete solutions. We have earned our reputation through:

OUR EXPERTISE and the constantly expanding knowledge base of our engineers.

Our hands-on approach and the added value we bring to the design of precast tunnel linings, shotcrete, underground metro and sewerage infrastructure and mining solutions gives us an insight that goes beyond the theoretical.

OUR AMBITION to support our customers to build structures more quickly, more safely, more efficiently and with greater creative ingenuity.

ArcelorMittal Fibres. Reinforced concrete solutions for the tunnelling industry.

Our long-standing experience, combined with our ongoing commitment to the development of the best performing steel fibres, has enabled us to develop a comprehensive range of advanced steel fibres for use in shotcrete and precast tunnel lining segments.

Time and cost savings

- Reduced volume of concrete required
- Easier mould filling and casting
- No rebar required
- Increased safety on-site
- Reduced material inventory

Time savings

Cost savings

Why choose ArcelorMittal Fibres?

Expert support

Comprehensive product range

Fibre performance

Guaranteed quality

Packaging options

Your reliable project partner

PRECAST TUNNEL LINING SEGMENTS

Installation of fibre reinforced tunnel segments, Doha Metro, Qatar.

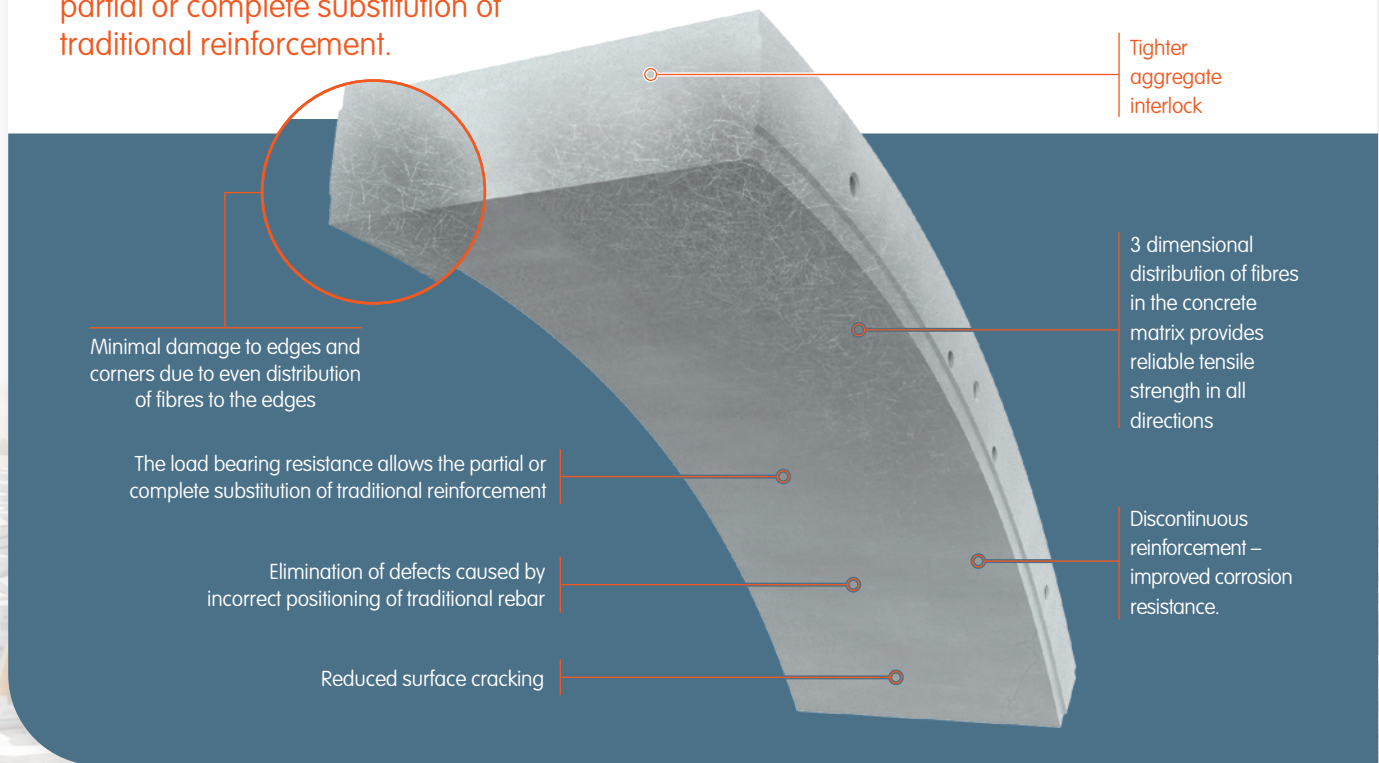

SHOTCRETE SOLUTIONS

Shotcrete works at Crossrail, London © Crossrail Ltd.

ArcelorMittal Fibres – Reinforced precast solutions

The load bearing resistance allows the partial or complete substitution of traditional reinforcement.

ArcelorMittal Fibres – Reinforced shotcrete solutions

Shotcrete solutions for temporary and permanent applications

Traditional mesh reinforced shotcrete

Uneven application of shotcrete due to mesh form therefore more material required

Fibre reinforced shotcrete

Even application of fibre reinforced shotcrete therefore less material required

The world is building on our expertise.

ArcelorMittal Fibres operates internationally. We are providing steel fibre reinforced concrete solutions for the tunnelling industry and participating in some of the world's major infrastructure projects.
