## Our customers in our plants

Innovation is part of WireSolutions' culture in partnership with ArcelorMittal's research centres. We were the first in the world to offer galvanised, waxed and sheathed strand for cable-stayed structures and higher tensile strands (> 2000 N/mm<sup>2</sup>).

Today WireSolutions is recognised worldwide for the quality of its Crapal® anticorrosion product range including the latest innovative coatings CrapalOptimum® and CrapalPremium® which are perfectly weldable. WireSolutions also proposes galvanised solutions, organic and polyester coatings according to your needs.

Our wires are produced according to ISO 9001, ISO 14001 and OHSAS 18001 standards.

Today WireSolutions wants to go further and integrate more closely and quickly to its customers' needs.

Bring teams together, understand how to share new added values, lead together the conquest of new markets and the development of new products, go over everyday life and achieve together Excellence: this is the way of working that WireSolutions wants to propose to its customers. The mobilization of resources of a global leader, serving market players, perpetuates our activities.

**Together let's move towards Excellence!**

# Oriented towards Excellence

A subsidiary of ArcelorMittal, WireSolutions has overcome the pitfalls of past and is today resolutely oriented towards the future in the research of Excellence for its customers.

With 14 plants throughout the world, WireSolutions offers a diversified portfolio of low and high carbon wires, strands, ropes and corrosion-resistant solutions.

WireSolutions is an active supplier to the **Automotive** industry, creating wire solutions for a large variety of car parts such as tyres, clutches, seats, wipers and many other applications.

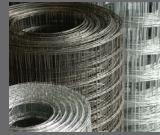

In **Construction**, steel fibres and PSC strands are reliable solutions for concrete reinforcement. A full range of fencing products is available for securing properties, roads, railways and industrial premises.

In the **Energy** sector, WireSolutions is a solution provider to the oil industry for the production of flexible pipes and is also heavily involved in new energies with its cutting wire for silicon for photovoltaic cells.

In **Agriculture**, a long tradition of high-quality environmentally friendly solutions means that our brand and products are recognised as being among the best.

## Product portfolio

### Fencing and Agri-business

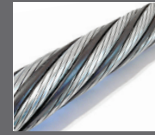

- Barbed wire
- Chain link fence
- Field fence
- Nails
- Vineyard wire
- Welded mesh

### High carbon

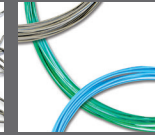

- Cold rolled wire
- Wires for springs
- Pre-stressed concrete
- Wire ropes

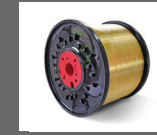

### Industrial products

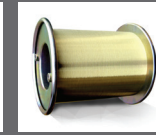

- Bright wire
- Cold heading wire
- Flat shaped wire
- Galvanised wire
- Steel fibres

### Steel cord and Saw wire

- Bead wire
- Hose wire
- Saw wire
- Technical cord
- Tyre cord

## Worldwide presence
